Work Experience

Senior Software Developer

Govineer Solutions
(Previously Civic Systems)

Aug 2023 – Present

Madison, WI

- Successfully led the migration of legacy systems into a modern unified system, resulting in a 50% improvement in system performance, enhanced user experience, and streamlined operations.
- Developed dynamic and responsive front-end applications using the Angular framework, enhancing user experience and ensuring seamless interaction across various platforms and devices.
- Leveraged Microsoft SQL Server and Entity Framework Core to store and manage application data, optimizing both database performance and development efficiency.
- Developed robust, scalable APIs and backend services using .NET Core, enabling seamless data exchange, testability, and improving system performance.

Application Developer

Civic Systems

Dec 2019 – Aug 2023

Madison, WI

- Designed and implemented seamless integrations between multiple financial systems, enhancing data accuracy, automating workflows, and reducing manual processing time for our clients.
- Successfully migrated an on-premise desktop application to a cloud-based web app, eliminating the need for remote support and enhancing accessibility, scalability, and maintenance efficiency.
- Led comprehensive training sessions for an internal team during transition, empowering them with the skills and knowledge to develop and support system integrations.

Application Developer

The Infosoft Group

May 2018 – Dec 2019

Intern

Milwaukee, WI

- Improved quality assurance efforts by designing and implementing a new auditing system
- Guaranteed minimal downtime to customers by efficiently implementing fixes to issues in support queue
- Slimmed down manual work load by developing automated processes for daily tasks
- Contributed to effective collaboration with development and support teams using the Agile framework

Education

Corvallis, OR

Oregon State University
